

Compliance & Security Standards

When we implement these **robust security measures**, we establish **reliability, resilience**, and **compliance** for our clients.

Certified Security Standards

- Compliant with **SOC 2 type 2, ISO 27001:2013**, and **ISMS** standards.
- Regular internal and external **security audits** to maintain compliance.

Network & Endpoint Security

- **Sophos firewall** for access control and network security
- **QuickHeal (Seqrite EPP)** for endpoint protection against viruses and malware.
- **Fully managed L3 network** to ensure secure data handling.

Access Control & Physical Security

- **SSO authentication** for controlled office email access.
- **24x7 CCTV surveillance**, security guards, and turnstile access control.
- **Multiple ISPs & Load Balance** to ensure **99.99% uptime** with static IPs.

Business Continuity & Data Protection

- **BitLocker** encryption for data.
- **Disaster Recovery (DR) & Business Continuity (BCP)** with multiple office locations.
- **24x7 power backup** to prevent service disruptions.

Employee Security Awareness & Policies

- Regular **cybersecurity training** to prevent phishing and threats.
- Strict **cellphone usage policies** to protect sensitive data.
