

AI-Powered QA

AI-powered quality assurance that combines AI review with human expertise to deliver accurate, verified inspection data and support fact-based underwriting decisions

Key Features

AI-Powered Report Review

Review every inspection form and photo for missed damage, inconsistent information, and unsupported recommendations before submission.

Photo-to-Form Verification

Cross-check inspection answers against property photos to identify contradictions and ensure the report reflects the actual condition.

Human-Verified QA

AI flags potential issues, while qualified loss-control experts confirm, correct, or dismiss every finding.

Client-Specific Rules

Apply your inspection standards and rules automatically across every inspection order.

Performance Scorecarding

Track program, client, and inspector-level QA trends to identify recurring errors and improve report quality.

Scalable QA

Handle growing inspection volumes with 24/7 QA capacity without adding equivalent internal headcount.

Service Offerings

Managed QA Service

We run QA for you.

Our loss-control experts operate the AI QA Agent on your inspection reports and return clean, underwriter-ready files.

- Faster, more accurate QA
- 24/7 capacity that flexes with volume
- 50–60% less than an internal QA hire
- Program and inspector-level scorecards

License the AI QA Agent

Put the agent in your team's hands

Deploy the AI QA Agent inside your existing environment so your QA team can review faster and catch more, while your reviewers make the final call.

- Accelerate your QA team
- Run inside your existing workflow
- Scale without adding reviewers
- Your rules, your environment, full audit trail
